READING

The history of the Olympic Games dates back to 776 BC, the year when the first athletic contest took place in Olympia in Greece. The festival was held every four years in the middle of summer and continued for over 1200 years. The modern Olympics, which were the idea of Pierre de Coubertin, were started in 1896 as a championship for amateur sports people. At the first re-established games in Athens, 12 nations competed in nine different sports. Since the start, the games have changed considerably and many memorable events have occurred. At the 1924 games, the Olympic motto citius, altius, fortius (faster, higher, stronger) was first used. It was also a year when a separate Winter Olympic Games were held. Four years later, women competed in athletics for the first time. Nowadays, the Olympic Games are the most prestigious sport event in the world and truly bring the whole world together.
